TIP OF THE MONTH

Are you tired of the book block sagging out of the cover? Problem Solved with the ODM Lock Binding Process.

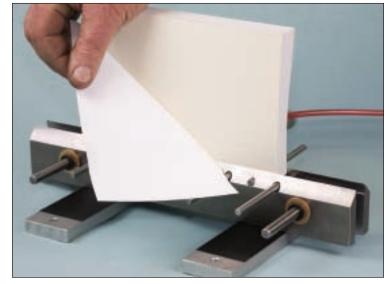

Lock Binding Layout

- Hot Melt Adhesive
- Soft cover (after front and rear cover removal)
- LBS Tabbed End sheet Reinforcement
- Perfect Binder Side Glue

ODM Lock Binding Process

- ✓ Add LBS tabbed end sheets to pages
- ✓ Perfect bind pages either with PUR or EVA
- ✓ Apply side glue while perfect binding
- ✓ Apply regular soft cover during perfect binding
- √ The soft cover basis weight needs to be 2 to 3 times thicker than LBS end sheet reinforcement.
- ✓ Strip front and rear soft cover from book block, leaving 1/4" wrap around on front and rear of block.
 ODM Stripper makes this process easy and precise.
 It is important that the binding is not damaged during this process.
- ✓ Casing-In and Building-In normally, positioning hot melt over the soft cover wrap. (If you are using an ODM Super Sticker™ with hot melt).

ODM Stripper

Stripper is used to cleanly remove front and back cover, leaving a 1/4" wrap around.

-Hinge Point of Book

(If soft cover wrap is strong enough!)

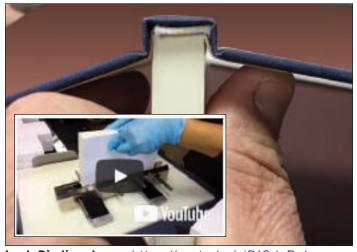

Key Points of Lock-binding

- Cover must hinge above the joint area to protect the binding. (Figure A)
- Soft cover MUST be stronger than the LBS reinforcement on the tabbed end sheets
- Soft cover front and rear must be removed cleanly, not damaging the book block

Problems & Solution Book Block Sags Out of Cover

- **a.** Soft cover wrap is not strong enough (forces hinge point towards the spine).
- **b.** Building-in point is too low (closer to the spine).
- **c.** Perfect binding side glue is not applied well.

Hinge Point Example

Lock Binding Book Block "How to Hardcover Bind on Small Perfect Binders" By Werner Rebsamen, Professor Emeritus RIT http://www.odmachinery.com/wp-content/uploads/2014/06/lockbindingbookblock_wernerarticle.pdf

BACK BY POPULAR DEMAND

Are you tired of pages falling out of your bound books?

Problem Solved with Side-Sewn Book Block Produced on ODM's Super Sewer™ XXL.

Back Tack Technology™ ensures a strong, side-sewn block with a reverse back stitch on the head and foot of the book block.

ODM's Next Generation Super SewerTM XXL is ideal for side-sewing book blocks up to one-inch (25 mm) thick.

Book size:

Minimum: 5" x 5" (125 mm x 125 mm) Maximum: 18" x 18" (450 mm x 450 mm);

up to 1" (25 mm) thick

Production: up to 400 book blocks per hour

Watch Super Sewer XXL video:

http://www.odmachinery.com/products/super-sewer-xxl/

Side-sewn book blocks are stronger and built-to-last for generations to enjoy.

If you're objective is to produce a strong, durable book binding look no further than the side-sewn book block. It's a fact, religious prayer and school text books are the toughest, most durable in the world and that's because those book blocks are side-sewn. Therefore, if you want your photo books, yearbooks, children's books to be bound to the highest quality and last for generations to enjoy you should seriously consider a side-sewn book block.

The Next Generation Super SewerTM XXL is an automatic side-sewing machine designed for producing 'on-demand' books from wallet to tabloid size and up to one-inch thick. The Super SewerTM XXL features the same **Back Tack TechnologyTM** as in the original Super SewerTM. Simply put, the machine does a reverse lock-stitch on the head and foot of the book block ensuring a very strong side sew which will not come apart like standard side-sewn or PUR bound books normally do. The Next Generation Super SewerTM XXL pre-drills holes prior to thread stitching enabling the book block thickness up to one inch. The Next Generation Super SewerTM XXL can sew up to 400 books per hour and is easy to operate with a touch screen LCD color control panel, high speed drill station and vacuum drill waste removal system. CE approved.

Benefits using side-sewn book blocks produced with ODM's Next Generation Super Sewer™ XXL

- ✓ Strongest method of any commercial binding.
- ✓ Book blocks do not come apart.
- ✓ Ideal for yearbooks, children's and photo books.
- ✓ Imposition layouts are not critical.
- ✓ No bind-fold is required.
- ✓ Side-sewing lock-stitch machine can handle any type of a stack of paper up to one-inch thick.
- ✓ Fast and efficient productivity as the entire book block is sewn through the side.
- ✓ Side-sewn books lay flatter than you think.

WHAT'S NEW AT ODM...

Menu Corners Made Simple with ODM's Panel Corner Applicator™

ODM Panel Corner Applicator™ is a semi-automatic machine designed to apply accurately aligned corners to menu panel inserts. No more carpal tunnel claims. Speed up production with this once hand process.

ODM Corner Panel Applicator[™] can apply 4 corners per 20 seconds; *that's up to 180 panels per hour.*

STANDARD FEATURES:

- Easy-to-operate LCD touch screen control panel
- Dynatec hot-melt supply unit provides exceptional value that's designed for precision glue application.
- Consistent symmetrical corners applied every time.
- Adjustable score pressure

Machine Affixed Panel Corners Accurately Aligned Every Time!

Top loading hopper stacks and pre-aligns corners.

Holds up to 200 die cut corners.

Menu panel is hand inserted into precision guides prior to depressing foot pedal cycle for panel corner application.

Panel formats available for lunch, dinner, beverage and dessert menus. http://www.odmachinery.com/products/panel-corner-applicator/

WHAT'S NEW AT ODM...

Corner cuts made simple with the ODM Slicer™ Corner Cutter

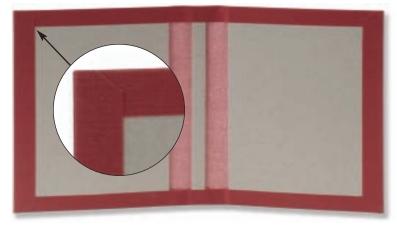

This is the only corner ODM will ever cut!

ODM Slicer™ is a simple, hand-operated machine designed to cut perfect corners on cover sheets (up to 1" stack height) prior to the casemaking process of producing the hard cover.

- No make-ready time is required
- Perfect symmetrical corner cut every time minimizes waste of cover material stock.
- Knife blade safety guard helps prevent injury

OPTIONAL TABLE STAND:

- Slicer[™] tabletop is bolted into stand
- Sturdy, heavy-duty steel legs
- Bottom shelf for storing cover stock
- Dimensions: 36"W x 26"D x 34"H

Close up of cut corner made with ODM Slicer™. The Slicer™ produces a perfect cover for the casemaking process in creating the hard cover outer shell for hard cover bookbinding.

CUSTOMER TESTIMONIALS...

ODM Saves the Day at BR Printers with a Just-in-Time Delivery of our Sticker™

Sticker™ Casing-in Machine!

This economical and compact machine was designed with on demand binding operations in mind. The operation of the StickerTM consists of placing the book on the wing while the machine is in the home position. After the book is loaded, the operator depresses a foot switch that drops the wing below the glue rollers.

A servomotor brings the two glue stations in contact with the book while the wing travels upward, applying a uniform coating of adhesive to the end-sheets. As the book emerges from the glue pots the operator places the cover in position with a handy cover guide and removes the book from the wing. No make-ready time is required as the machine is self-adjusting. Glue stations are easily removed for a quick cleanup.

• Produce 100 to 400 books per hour.

OPTIONAL FEATURES:

- Extra paste attachment deposits additional adhesive in joint area.
- Three position blade height control.
- Small roller glue station for rounded and backed books.
- Large format model available.

Sticker™ XXL available for producing tabloid books up to 4" thick.

Thank You John and the ODM Team!

We recently had a major equipment failure on casing-in equipment that was not from ODM. John and the ODM team did an outstanding job working with us to get a Sticker delivered and operational within 2 days. Well done!

Cover Guide Designed for Casing-in Thin Books.

ODM SUPER-LINE INSTALLATION

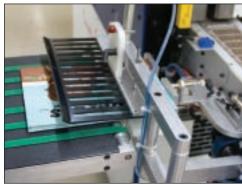

On Demand Machinery installs the ODM Super-Line™... an automated Super Sticker™ and Super Smasher™ at Morris Publishing.

On Demand Machinery has installed their latest Super-LineTM, anautomated casing-in and building-in machines at Morris Publishing located in Kearney, Nebraska. ODM auto-feed transfer station allows for a seamless assembly line for hard cover book production from the casing-in to the building-in process. Cased-in hard cover books come off the Super StickerTM conveyor belt and are automatically transferred into the Super SmasherTM for building-in. Ideal for producing high volume 'library-quality' hard cover books on demand.

Morris Publishing specializes in short-run book printing and bindery services for self-published authors. Morris Publishing has printed millions of books for individuals, businesses, and small book publishers, including poetry, fiction, religious, how-to, and local histories, as well as books and manuals for companies and organizations. They even have a separate division that specializes in cookbook publishing.

View demo on Super-Line: http://www.odmachinery.com/products/transfer-station/

Cased-in book comes off Super Sticker™ conveyor belt.

Hard cover book is lifted 90° into an upright position and loaded into Super Smasher™ via conveyor belt.

Electronic eyes align book, insuring a smooth transfer into Super Smasher™ for building-in process.

ODM RECONDITIONED MACHINES

How Digital Hardcover Bookbinding Can Lead to New Business

by Denis Wilson, Editor of Book Business Featured online in Book Business Insight October 2015

In this White Paper you'll learn first hand from Denis Wilson how bindery departments can add value to your finished product. It may require a bit of a mind-shift, given that bindery departments have typically been looked upon as cost centers, but digital hardcover binding can in fact become a profit center for commercial printers. An in-house digital hardcover bindery is an opportunity for printers to create value for their clients by helping them cut costs, meet consumer demands quicker, and produce higher-profit products, all of which can lead to new clients and more business with existing customers.
